Scene Projector

Power quality test
of AH-64
helicopter

Exciting and challenging work utilizing state-of-the-art tools and equipment in state-of-the-art facilities at a "World Class" advanced testing center.

- Your new work environment will consist of working with state-of-the-art tools and equipment in state-of-the-art facilities (laboratories and outdoor ranges). Your engineering and design skills will be utilized on a variety of "cutting edge" technologies.
- In the course of typical year, you will work on a number of both diverse and challenging projects. In most instances, your involvement will start at the beginning of a project and continue through completion. During the course of each project, you will be involved in and/or exposed to all project phases (i.e. "test" planning, design, preparation, conduct, evaluation and analysis, report preparation, etc.).
- All projects provide opportunities for "hands-on" testing experience. As a result, you will have the

opportunity to apply your engineering skills and expertise to the improvement of actual test hardware.

- As a key member of RTTC's "advanced testing" team, which routinely implements integrated programs of testing, modeling, and simulation, your engineering skills and insights will be quickly elevated and honed. Within the RTTC community, it is often stated that "one test is worth a thousand expert opinions."
- **An "engineering" education is very broad and provides exposure to many potential areas of interest. If you are not sure as to what area, within your field, that you want to pursue, then RTTC is a GREAT place to start. RTTC is a flexible organization that allows you the opportunity to explore different areas. Find out what you really want to do!**

RTTC utilizes a broad range of engineering and computer disciplines to test and evaluate the most advanced military systems in the world. **The opportunity to expand your technical experiences throughout the entire engineering and scientific spectrum is unparalleled**
