

United States Army
Redstone Technical Test Center (RTTC)

Resources

Personnel/Technical Expertise

RTTC is committed to staying on the "cutting edge" of weapon system test and evaluation by continually upgrading and refining our test facilities and methods and integrating modeling and simulation and hardware-in-the-loop technology. To accomplish this objective, RTTC must maintain a highly educated, experienced, motivated, and innovative workforce. Shown below are some of the key facts that validate the critical strengths of our personnel.

- Our customers provide feedback that they value:
 - the knowledge base (subject matter expertise) of our staff
 - the flexibility and innovation of our personnel in responding to a wide range of changes
 - the "work values" that permeate the RTTC workforce
- RTTC, as an organization, has over 50 years of experience testing weapon system components and subsystems – from "cradle-to-grave." This translates into numerous benefits for our customers including:
 - the organization has large numbers of personnel with over 10, 20, and 25 years of relevant experience
 - RTTC personnel know how to successfully manage T&E projects and programs
 - valuable information, expertise, procedures, etc. are continually being passed on from the senior employees to the newer employees
- The Center staff, of over 500 personnel, is primarily composed of engineers and technicians. Shown below are pie charts that provide an overview of the important attributes of our valued staff.
