Test Area 10: Hazardous Component Test Facility

Test area 10 is a 650-acre, remote site, primarily used for handling, testing, and storing weapon system components, both hazardous and non-hazardous. Capabilities and facilities include;

- Secure storage facilities
- Assembly and disassembly facilities
- A pilot plant for propellant conversion
- Large X-Ray facilities

The site also serves as the "future location" for a variety of planned facilities to meet customer needs (i.e. Advanced Multi-Spectral Sensor Suite Test Capability).
