

Welcome Who We Are **What We Do** Resources How We Work Where We Are Going How We Meet Our Customers' Needs

United States Army
Redstone Technical Test Center (RTTC)

What We Do

Stockpile Reliability and Surveillance Testing

Shelf Life Component Testing

Shelf Life Component Testing isolates where a particular problem exists, either due to environmental factors, age, etc. Individual components are disassembled for a more accurate test of the items - this aids in determining the shelf life of the item and any special storage requirements.

[Adobe Acrobat Reader](#) is required.

A horizontal navigation bar with a light gray background and rounded corners. It contains three main elements: a blue button on the left with white text, a central white box with blue italicized text, and a blue button on the right with white text. The right button is positioned slightly higher than the others, creating a tab-like effect.
